

Beating the Barriers in Ecology, Evolution, and Conservation Biology

Winter term 2021
Wednesdays at 4:00 p.m.

How to watch:
Zoom: beav.es/eech
YouTube: beav.es/oSs

REGISTER FOR THE COURSE

Graduate FES 507 (CRN 35882)
FW 507 (CRN 33431)
IB 507 (CRN 37246)

This virtual webinar is free and open to the public!

January 6 // Saving Sea Turtles with Conservation Technology & Dance

Lekelia Jenkins, Arizona State University

Associate Professor, School for the Future of Innovation in Society,
College of Global Futures, Consortium for Science, Policy & Outcomes

January 13 // Urban Biodiversity, Nearby Nature, and Environmental Justice

Charles Nilon, University of Missouri

William J. Rucker Professor in Fisheries and Wildlife

January 20 // Ecological and social implications of behavioral syndromes

Andy Sih, UC Davis

Distinguished Professor in Department of Environmental
Science and Policy

January 27 // Dragonfly, Damselfly and Dictyoptera Evolution

Jessica Ware, American Museum of Natural History

Assistant Curator, Odonata & non-Holometabolous Minor Orders,
Principal Investigator, Sackler Institute for Comparative Genomics,
Assistant Professor, Richard Gilder Graduate School

February 3 // Do Wolves Really Change Rivers? Revisiting the Yellowstone Trophic Cascade Debate

Michel Kohl, University of Georgia

Assistant Professor of Wildlife at Warnell School of Forestry
and Natural Resources

February 10 // Title TBD

Xavier Basurto, Duke University

Associate Professor of Sustainability Science, Nicholas School
of the Environment

February 17 // Managing biodiversity with eDNA: leeches, ponds, and insects

Douglas Yu, University of East Anglia, UK

Professor, School of Biological Sciences, and Director of the Ecology,
Environment, and Conservation Center at the Kunming Institute of
Zoology, Kunming, China

February 24 // Diversity and conservation of mexican salamanders

Gabriela Parra Olea, Universidad Autónoma Nacional de México

Professor in the Biology Institute, National Autonomous

March 3 // Climate change in streams and rivers along the Andean-Amazon gradient

Andrea Encalada, Universidad San Francisco de Quito

Professor, BIOSFERA Institute and Aquatic Ecology Lab

March 10 // Title TBD

Kishana Taylor, UC Davis

OSU Women in Science Invited Speaker: Postdoctoral scholar in the
Department of Microbiology and Molecular Genetics

**Oregon State
University**

SPONSORING DEPARTMENTS

Forest Ecosystems and Society, Fisheries and Wildlife, Integrative
Biology, Botany and Plant Pathology, OSU Research Office, and
Forest Biodiversity Research Network
